

NISHIT KUMAR

Bengaluru, India | +91-9561559117 | apsnishit20k@gmail.com
B.Tech, Computer Science and Engineering — Amrita Vishwa Vidyapeetham, Bengaluru

Summary

Computer Science engineering graduate with a strong interest in product development and hands-on experience building AI/ML-powered applications using Python. Complemented by full-stack development experience with Angular, Node.js, MongoDB, and RESTful APIs, with a solid foundation in software engineering fundamentals. Eager to bring a fast-learning, builder's mindset to a technical consulting environment focused on delivering client outcomes.

Education

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Amrita Vishwa Vidyapeetham, Bengaluru | CGPA: 7.07

Internship

Full Stack Developer Intern — Kekkar Infotech & Services Bengaluru, India

- Built a Hospital Appointment and Surgery Information Website using Angular, Node.js, and MongoDB.
- Built scalable web applications by integrating RESTful APIs, developing reusable UI components, implementing form validation, and ensuring secure data handling.
- Designed responsive pages referencing Aster and Manipal Hospitals, integrating blogs and dynamic content.
- Collaborated in an Agile/Scrum team environment, participating in sprint planning and daily standups, strengthening understanding of full-stack architecture and project deployment workflow.

Projects

Hospital Appointment and Surgery Information Website Angular, Node.js, MongoDB

- Designed a patient portal for appointment scheduling, surgery info access, and clinic exploration.
- Integrated Google Maps, blog sections, PDFs, and media galleries for a rich, interactive interface.
- Implemented secure forms, RESTful API handling, and modular front-end components.
- Collaborated on deployment and testing to ensure stability and fast load times.

NoshGuard — Smart Product Advisor for Ingredient Risk Analysis Python, OCR, AI APIs, Frontend UI

- Built a real-time OCR pipeline processing food labels in under 2 seconds, detecting 15+ allergen/additive categories.
- Integrated an AI-based analyzer to categorize ingredients by risk and provide safe alternatives.
- Designed a clean, intuitive dashboard enabling instant feedback and scan history tracking.
- Improved system responsiveness by 30% via asynchronous task handling and request-level caching.

Predicting Myocardial Infarction Complications Using Ensemble Learning Python, scikit-learn, XAI, Ensemble Models

- Applied feature engineering and Winsorization for data normalization on clinical AMI datasets.
- Trained multiple classifiers (SVM, Random Forest, XGBoost, KNN) and combined via hybrid ensemble voting, reaching 97.42% accuracy.
- Used Explainable AI (XAI) to interpret key medical predictors, aiding clinical decision support.

Certifications & Research Publications

- Learn Python Programming Masterclass — Udemy (2024)
- AMATHE, IEEE, 2025 — "Gaze-Based Fake News Detection: Insights from the FakeNewsPerception Dataset"

Technical Skills

Languages: Python, Java, HTML, CSS, JavaScript

Frameworks: Angular, Node.js, Express.js, Flask

Libraries & Tools: NumPy, Pandas, scikit-learn, PyTorch, TensorFlow

Databases & Cloud: MongoDB, MySQL, AWS

Development Tools: Git, GitHub, VS Code, Jupyter Notebook

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, SDLC, Agile/Scrum

Soft Skills: Leadership, Team Collaboration, Fast Learner, Effective Communicator
